RIGO® Surfspachtel

RIGO®-Surfspachtel is a white two part repair paste developed especially for repairing all Windsurf / Surfboards or boats made from ASA, ABS, Copex, Epoxi, Polyester, Makrolon etc.

RIGO®-Surfspachtel is simple to use, reacts with no core foam and needs no topcoat

It is sold in a set with abrasive paper and a plastic spatula either filled in two tubes or - for a better dosage - in two syringes. For repair centres it is available also in cans.

72g Tubes
40 ml Syringes
400g Cans
1000g Cans

Art.-No. W101 a
Art.-No. W101 b
Art.-No. W102
Art.-No. W103

RIGO® Boots- und Surfspachtel bunt

The well known RIGO® Surfspachtel in common colours. Two small cans with abrasive paper and plastic spatula. For repair centres also available in larger cans.

Standard colours: red, yellow and blue
Special colours: grey, other colours on request

50 g Cans

Art.-No. W115

RIGO® PE Spachtel

RIGO® PE Spachtel is especially tuned on the properties of polyethylene. Observing the given mixing ratios, this mass is to handle similar to usual spatula masses.

450 g Cans Art.-No. W105

RIGO® Surfspachtel Rapid

RIGO®-Surfspachtel Rapid is a spatula mass, similar to the normal spatula masses, but it reacts more quickly. Observing the given mixing ratios, this mass is to handle similar to usual spatula masses.

102 g Can and syring Art.-No. W104

RIGO® Epoxy Reparaturset

Das RIGO® Epoxi - Reparaturset is ideal suited not only for the repair of custom made boards or boats from epoxi.

The colourless transparent two component repair material does not cover designs and is, on the other hand, in connection with glass texture well suited to repair larger damages.

The set contains two syringes for easy dosage, abrasive paper, plastic spatula and glass texture. This material is also available as resin for laminating in larger cans.

40 ml Syringes
375 g Cans
1 Kg Cans

Art.-No. W106
Art.-No. W109
Art.-No. W110

RIGO® Epoxi Stick

RIGO® Epoxi Stick is a kneadable two component repair mass for all boards or boats, even adhering on wet surfaces, hardening to a white mass.

120 g Stick Art.-No. W108

RIGO® UV Repair Products

These modern products are to be applied in a room without direct sunlight. When put into sunlight, they harden within 2 to 20 minutes, concerning to thickness of repair area and intensity of sunlight. At least there should be some shadows produced by the sun. Instead of sunlight these products also react to get hard, when put into the light of a UV lamp.

UV Schnellreparatur

Quick repair is a middle viscous fluid for the quick repair of small damages, like small holes, scratches and clefts. The material is delivered in a black, light protecting flask with a small brush in the stopper.

100 ml Flask

Art.-No. W120

UV Spachtel

UV-Spatula mass is equal to the UV quick repair, only with higher viscosity to repair larger damages. It is delivered in a can with grind paper and plastic spatula.

70 g Can

Art.-No. W121

UV Reparaturset

The UV repair set consists of resin, hardener and glass texture, equal to the epoxy repair set. In opposite to this, here all components are already mixed. The short glass texture gives high stability in all three room directions. So forming repairs, f.e. the edge, are possible.

70 g Can

Art.-No. W122

All UV materials are clear and light yellowgreen. Colouring of these products is not possible at the moment. After hardening the repair areas can be grinded, polished or worked up with RIGO® spatula masses white or coloured.

Larger cans are available for repair centres.

RIGO® Polyester Reparaturset

Polyester repair set was especially developed for custom made boards or sport boats from polyester. The set contains resin, hardener, glass texture, grind paper and spatula.

52 g Tubes

Art.-No. W107

RIGO® Foam

RIGO® Foam is a two component hard foam for quick filling of cavities in boards and boats.

2x100g Flask / syring

Art.-No. W207

RIGO® Segeltape

The sailtape is achievable in two different qualities.

RIGO® Sailtape LH is for a quick and long lasting repair of all sails made from cloth.

RIGO® Sailtape is for quick and short-dated repair, f.e. during the holiday until to the repair by a sail maker.

LH: 15 x 50 cm Stripe
standard: 15 x 50 cm Stripe

Art.-No. 401

Art.-No. 401 b

(Material 100% Polyester)

RIGO® Mylartape

Mylartape is well suited for a quick, simple and long lasting repair of sails made from foil or mylar covered sails.

15 x 50 cm Stripe
15 cm x 15 m Roll

Art.-No. 402

Art.-No. 403
